Manufacturing the Thermo Equipment

SOLAR BOILERS

Solar boilers, in addition to electric heaters, have installed two heat exchangers. The first one is intended for mounting on central heating system or similar installations of closed type. The second is intended for connecting with solar collector. Models are available with volume from 80 to 150 liters.

TECHNICAL DATA

Volume (liters)	80	100	120	150
Heater Power (W)	2000	3000	3000	3000
Tension (V)	230	230	230	230
Work Pressure MPa (bar)	0,6(6)	0,6(6)	0,6(6)	0,6(6)
Water Connection	1/2"	1/2"	1/2"	1/2"
Heating Time T-75°C (h)	1,75	4,5	5,4	6,3
Height (mm)	720	890	1050	1220
Radius (mm)	450	450	450	450
